SUMMARY

Engineer and analyst with hands-on experience across AI prototyping, project delivery, and cybersecurity. Currently completing an MSc in Cybersecurity Risk Management at the University of Galway, with recent projects spanning agentic AI for accessibility (Vela), AWS-powered multilingual support agents, BI dashboards for global operations, and adaptive risk frameworks for financial services. Equally comfortable shipping prototypes, leading client-facing delivery, or translating complex technical work into clear business outcomes.

EDUCATION

MSc. Cybersecurity Risk Management

University of Galway, Ireland (2025 – Present)

B.Tech Information Technology

Pillai College of Engineering, Mumbai University (2021 – 2024) | Grade: (9.10/10)

WORK EXPERIENCE

Project Engineer — Network & Security · Tata Communications (Novamesh), Pune Jul 2024 – Aug 2025

- Managed 10+ enterprise clients, delivering data-driven performance insights and improving network uptime.
- Automated reporting workflows using Python, enabling faster analysis and improved decision-making.
- Analyzed performance trends and translated technical data into client-facing insights and recommendations.
- Ensured compliance and system reliability, aligning operations with business and risk management requirements.

Data & Operations Intern · Navtor India Pvt. Ltd., Mumbai Sep 2023 – Jun 2024

- Built BI dashboard tracking performance across 30+ clients, improving visibility into key business metrics.
- Conducted data analysis and user behavior evaluation to identify inefficiencies and optimization opportunities.

Software Engineering Intern · Ingenium Marine Pvt. Ltd., Mumbai Aug – Dec 2021

- Built and improved web interfaces using HTML, CSS, JavaScript to enhance UX.
- Performed functional, regression, and UAT testing for reliable releases.

RECENT PROJECTS

Vela — AAC Communication System for ALS/MND Patients · Independent Build 2026

- Multimodal AI app combining voice cloning (ElevenLabs), agentic personality rewriting (Groq LLM), eye tracking (WebGazer.js), and pictogram fallback — preserving patient identity as ALS progresses. Live on Vercel.

AI-Based Cyber Risk Evaluation for Financial Institutions · MSc Dissertation, University of Galway 2025–2026

- Adaptive risk framework grounded in ISO/IEC 27001:2022 and NIST CSF, with full AWS observability (EC2, CloudWatch, Loki, Grafana) and a Power BI executive dashboard linking SOC operations to GRC governance.

SKILLS

AI & Cloud: AWS Bedrock · Lambda · DynamoDB · Cognito · S3 · ElevenLabs · Groq LLM · RAG · LangChain · TensorFlow · CNN · Docker · Vercel

Development & Data: Python · JavaScript · React · Node.js · HTML/CSS · Flask · SQL · Power BI · Git

Cybersecurity & Networks: NIST CSF · Network Monitoring · GDPR · Snort IDS · Risk Analysis · Threat Modelling

Delivery & Strategy: Project Engineering · Client Relationship Mgmt · Stakeholder Reporting · Cross-team Coordination · PESTEL · Design Thinking

ACHIEVEMENTS, CERTIFICATIONS & LANGUAGES

Awards: Bronze Medal- President's Award for Innovation & Entrepreneurship, Galway IdeasLab (2026) · Winner - Innovation4Sustainability Hackathon, Portershed Galway (2025)

Certifications: Microsoft Certified — Azure AI Fundamentals (AI-900)

Languages: English (IELTS 7.0) · Spanish (A1, working toward B1) · Hindi & Marathi (Native)
